EDUCATION

Bachelor of Engineering in Computer Science & Engineering – AI & ML

Siddaganga Institute of Technology - Tumakuru

2023 – 2027

CGPA: 7.90/10

TECHNICAL SKILLS

Programming: Python

Web Development: HTML5, CSS3, React, Node.js

Backend & APIs: FastAPI, Flask

AI/ML Frameworks: TensorFlow, OpenCV, Scikit-learn

Databases: MongoDB, Firebase

DevOps & Tools: Git, GitHub, Docker

EXPERIENCE

Technical Team Lead – Mini Projects & Hackathons

2024 – Present

- Led teams of 4-6 developers across 8+ national hackathons, achieving Top 10 placements in 50% of events
- Architected and deployed 10+ AI/ML solutions from ideation to production, reducing development time by 30% via CI/CD
- Managed project lifecycle including code reviews, model training, testing, and cloud deployment using Docker and AWS
- Implemented MLOps practices for model versioning and monitoring, increasing model performance by 15-20%

PROJECTS

Real-Eye – Deepfake Detection Platform

Tech Stack: Python, TensorFlow, Keras, OpenCV, FastAPI, Docker, AWS

- Developed CNN-LSTM deepfake detection system achieving 94% accuracy on FaceForensics++ benchmark dataset
- Preprocessed and augmented 50,000+ video frames with feature engineering for facial landmarks and temporal analysis
- Deployed FastAPI endpoints for real-time inference at 15 FPS with 200ms latency; optimized model with TensorRT, reducing size by 60% and improving speed 3x

AI Website Builder – Automated Website Generation Platform

Tech Stack: Python, GPT-4 API, Flask, FastAPI, React, MongoDB, Docker, CI/CD

- Built AI platform auto-generating responsive websites from prompts, reducing creation time from hours to 2 minutes
- Integrated GPT-4 with custom prompts achieving 85% code quality; generated production-ready HTML/CSS/JavaScript
- Deployed microservices on AWS with Docker and GitHub Actions CI/CD, handling 500+ requests/day with 99.5% uptime

Smart PDF Search Engine – AI Document Query System

Tech Stack: Python, NLTK, Hugging Face Transformers, FAISS, Elasticsearch, FastAPI, PostgreSQL

- Engineered hybrid search engine (BM25, TF-IDF, BERT embeddings) improving accuracy by 40% on 10,000+ PDFs
- Built NLP pipeline for document ingestion, preprocessing, and semantic chunking; indexed 1M+ chunks in FAISS vector DB
- Developed FastAPI for context-aware QA with citations, serving 200+ queries/min with 88% accuracy and 50ms response time

ACHIEVEMENTS

- Top 10 Finalist** – Kalp-AI-thon 2025 (National AI/ML Hackathon)
- Winner** – Bluetooth Controlled Robot Competition
- Top 10 Team** – Smart India Hackathon (Internal Round)
- Runner-up** – Starlink Innovation Challenge
